

## Electronic Parcel Lockers

Never miss a parcel delivery again! The parcel locker system offers convenience and security of parcel deliveries to residents;

Residents will need to register to use the lockers, which will allow deliveries to be received and signed for electronically without needing to be at home;

To register, download the smart phone mobile app "PILOT MY PARCEL LOCKER 2018" from the app store;

When setting up the app, you will need to enter your unique verification code which is printed on a sticker that has been affixed to the inside of your letterbox in the lobby;

Upon receipt of a parcel, residents will be immediately notified of the delivery by SMS, email and push / app notification and you will be able to retrieve the parcel by scanning the QR code from the screen of your mobile on the parcel locker computer or by entering the PIN code sent with the notification;

The parcel locker will store your delivery up to 48 hours for free. If your delivery has not been collected after this time, a late fee of \$1.50 per day will apply. Prompt collection of parcels is preferable to ensure there is adequate capacity for all residents as numerous parcels are delivered every day;

Refer to the website for further information: [www.myparcellocker.com](http://www.myparcellocker.com)

## Your new parcel locker is ready to use.

Your intelligent parcel locker is now installed and is available exclusively for the use of residents. Upon entry to the building, the parcel locker is located to the right of the foyer.

Experience a more secure and convenient way to receive your important deliveries.

Simply download the *PILOT MY PARCEL LOCKER 2018* APP and complete your registration. Be sure to enter a password and your unique verification code in the appropriate boxes.
